

Matias Bacelar

Buenos Aires - Argentina | (+54) 2215590776 | matiasbacelar@gmail.com | Portfolio @ matiasbacelar.com | LinkedIn

Software Developer with a focus on Frontend Development and strong knowledge of **JavaScript (ES6+), React, Next, HTML5, CSS3, Redux, Storybook, Typescript, Vite**, and **Jest**.

Strong understanding of design principles, UI/UX, advanced CSS (**CSS modules, SASS, styled components**), design systems, and responsive design.

Positive attitude, strong work ethic, and a focus for results while focusing on code quality, scalability, and performance.

Frontend Developer Darwoft | Buenos Aires, Argentina | September 2023 - Present

- Developed a component library for one of the company's clients to build multiple applications with the same set of components.
- Built an application to generate reports based on agronomic information on soil studies, where I used the mapbox library to generate dynamic data-driven maps to visualize soil properties.
- Develop a tool to dynamically visualize soil study reports on a map; develop functionalities such as maps with data-driven layers, layer comparison, synchronization of multiple maps, multi-layers, ruler tool, among others.
- Built a tool to visualize soil study reports through different types of graphs, such as line charts, bar charts, doughnut charts, and scatter charts, among others.
- Implement performance improvements to optimize rendering of data-driven layers.
- I participated in the development of a system for a US client composed of three subsystems (a gamification platform, a wallet and a marketplace) where I spent most of my time on the development of the marketplace and the marketplace admin application.
- I was in charge of carrying out demonstrations of new features of the marketplace as well as the marketplace admin at the end of each sprint for the client of this project.

Frontend Developer Modo Agrario | Buenos Aires, Argentina | May 2022 - September 2023

- Developed and maintained code for the company software (Collaborative E-sourcing platform) with React and his ecosystem.
- Implement performance improvements to the Collaborative E-sourcing platform to improve loading times.
- I built the company website and implemented internationalization with the help of the i18n library.

Freelance Developer Buenos Aires, Argentina | August 2021 - May 2022

- Developed a website for the SPB Circle of Officers (an institution from my city) with React and his ecosystem.
 - Developed a website called Tiendas Platenses with Wordpress and PHP.
-
