Matias Bacelar

Senior Full Stack Developer (Frontend-Focused)

Buenos Aires - Argentina | (+54) 2215590776 | matiasbacelar@gmail.com | Portfolio @ matiasbacelar.com | Linkedin

---

Professional Summary

Frontend-focused Full Stack Developer with strong experience building scalable, data-intensive web applications using React, TypeScript, Next.js, Kotlin, and modern cloud architectures.

Specialized in complex user workflows, document-driven systems, AI-assisted processing, and high-reliability UX.

Proven ability to work across frontend, backend, infrastructure, and DevOps to deliver production-grade platforms in healthcare, marketplace, and data visualization domains.

Professional Experience

Darwoft — Full Stack Developer

March 2025 – Present

Project: Document Processing & Retrocoding Platform (Healthcare / Risk Adjustment)

- Built a multi-tenant healthcare platform using Kotlin + Spring Boot to manage documents, patients, encounters, and medical conditions.
- Implemented document ingestion pipelines with S3, async processing, and workflow orchestration.
- Integrated AI extraction with human-in-the-loop review and audit trails.
- Developed a React + TypeScript app with PDF viewer, text highlighting, and coder workflows.
- Built a NestJS Backend-for-Frontend (BFF) to centralize authentication, API orchestration, and frontend security.

Darwoft — Frontend Developer

Oct 2024 – Mar 2025

Project: Marketplace & Gamification Platform

- Built the marketplace and admin panel for a multi-system platform (wallet, gamification, marketplace).
- Delivered product management and operational workflows for business users.
- Led end-of-sprint demos presenting new features directly to the client.

Darwoft — Frontend Developer

Sep 2023 – Oct 2024

Project: Agronomic Visualization Tool

- Built a web application for agronomic reporting based on soil studies, using Mapbox to render dynamic, data-driven maps of soil properties.
- Developed advanced map features including multi-layer visualization, synchronized maps, layer comparison, and measurement tools.
- Implemented interactive charts (line, bar, doughnut, scatter) to analyze soil data.

Modo Agrario — Frontend Developer

May 2022 - Sep 2023

- Developed and maintained a collaborative e-sourcing platform using React.
- Improved performance, UX, and internationalization (i18n).
- Built scalable UI components in collaboration with backend and product teams.

Freelance — Frontend Developer

Aug 2021 - May 2022

- Built React websites and WordPress platforms for public institutions and small businesses.
- Delivered responsive UI, deployment, and client customizations.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Kotlin, HTML5, CSS3

Frontend: React, Next.js, Mantine UI, Tailwind CSS, Storybook, GSAP, Motion, Vite, NX

Backend: Node.js, NestJS, Spring Boot, TypeORM

Databases: PostgreSQL, MongoDB

Cloud & DevOps: AWS (ECS, EKS, S3, RDS, IAM, CloudFront, Lambda, Step Functions, Comprehend Medical, VPC, CloudWatch, Secret Manager), Kubernetes (kubectl, Helm, ArgoCD, Crossplane), Terraform, GitHub Actions

Tools: Git, GitHub, Bitbucket, Linux, Cursor, VS Code, Jira, Azure DevOps

---

Education

AlconadaIT Bootcamp — HTML5, CSS3, jQuery, UI Design

Sicos Informática Bootcamp — PHP & MySQL
